1. Introduction

The PROGRAMMING CLUB, is a student-centered organization established to promote technological knowledge, curiosity, digital creativity, teamwork, collaboration, and networking among students. Operating under the banner of "Innovators in Action," the society provides students with opportunities to explore information technology and computer science beyond the classroom.

Society Motto:

Learn • Code • Create • Transform

2. Vision and Mission

The strategic direction of PROGRAMMING CLUB is guided by its core purpose to shape the digital tomorrow:

- Vision: Empower students to become creative problem-solvers through technology.
- Mission: Build a platform for digital literacy and innovation.

3. Core Values

The IT Society shall promote the following foundational values:

- Innovation: Think differently and create new technological solutions.
- Integrity: Be honest in developmental work, coding, and data handling.
- Collaboration: Work cooperatively to solve technical problems.
- Leadership: Guide peers in technological initiatives.
- Excellence: Strive for high standards in software and hardware projects.
- Creativity: Develop new ideas and user-centric designs.

4. Organizational Structure

The IT Society shall function through the following structure:

A. Advisory Committee

- Principal & Vice Principal: Provide overall administrative support and approve major programmes.
- Teacher-in-Charge: Supervise activities, guide the Executive Committee, and ensure lab safety.
- Member Teachers: Provide subject-related guidance for IT and Computer Science activities.

B. Executive Committee

- President: Leads PROGRAMMING CLUB, chairs meetings, and coordinates the annual programme.
- Vice President: Assists the President and manages internal project teams.
- Secretary: Prepares meeting agendas, maintains minutes, and manages official correspondence.
- Treasurer: Maintains accurate financial records, records income and expenditure, and handles budgets under supervision.
- Media Personnel: Documents activities, prepares promotional assets, and maintains the society's media archive.

5. Membership and Recognition

Membership

Membership is strictly open to students in Grades 9–12. Members are expected to attend society meetings, participate actively in coding and tech programmes, and demonstrate responsible digital behaviour.

Recognition

Students who demonstrate outstanding participation, tech leadership, digital creativity, or technical achievement may be recognized through:

- Certificates of achievement
- Technology and innovation awards
- Appreciation letters
- Special recognition during school events

6. Core Activities and Functions

PROGRAMMING CLUB focuses on practical, hands-on technological development. The society shall organize and participate in:

Workshops

- Coding Workshops: Peer-led and expert-guided sessions focusing on programming fundamentals and full-stack development (e.g., building web applications using HTML, CSS, JavaScript, Python Flask, and MySQL).
- Networking Workshops: Practical STEM sessions focusing on enterprise network architecture, including VLAN segmentation and inter-VLAN routing using simulators like Cisco Packet Tracer.
- Tech Talks: Seminars exploring advanced technological concepts and industry trends.

Competitions

- Hackathons: Intensive coding events where student teams design and deploy software solutions, such as automated attendance systems or fee calculators, within a set timeframe.
- AI & IOT Challenges: Competitions requiring students to bridge hardware and software through automation and artificial intelligence.
- Software Project Competitions: Internal showcases of student-built web tools, past-paper compilation databases, or digital UI designs.

Field Visits

- Organized trips to technology companies and software development firms to bridge academic learning and industry application.

7. IT Day / Exhibitions

The Programming Club shall organize an annual IT Day with ITSRI to provide students with an opportunity to demonstrate their knowledge, digital creativity, and software inventions. Activities for IT Day may include:

- Live coding and software demonstrations.
- Hardware and multi-branch network model displays.
- Technology stalls and innovation showcases.
- Live AI & robotics demonstrations.
- Guest lectures from industry professionals.
- Final rounds of major inter-school tech competitions.

8. Event Management and Budget Setting

For every major event (e.g., Hackathons, IT Day), an organizing team shall be appointed. The team must prepare a comprehensive event proposal that includes:

1. Objectives and Programme Schedule: Clear timelines for the event.
2. Budget Setting: The Treasurer and organizing committee must draft a detailed budget outlining expected costs (e.g., server hosting, hardware components, awards) and potential funding sources. All budgets require approval from the Teacher-in-Charge and school administration.
3. Resource Allocation: A comprehensive list of required materials, software licenses, and networking equipment.
4. Duties and Responsibilities: Clear task delegation among committee members.

9. Programming Club Meetings

Regular meetings shall be conducted to ensure smooth society operations. These meetings serve to:

- Plan upcoming coding workshops and hackathons.
- Review completed activities and software projects.
- Assign responsibilities for upcoming events.
- Address technical or administrative challenges.
- Monitor the progress of ongoing development projects.

Minutes of all important meetings must be recorded and maintained by the Secretary.

10. Monthly Reports and Documentation

To maintain accountability and track progress, the society must generate regular documentation.

- Activity Reports: A report shall be prepared after every major workshop, competition, or tech talk. These must include the event name, objectives, number of participants, results/achievements, and recommendations for future activities.
- Monthly Progress Reports: The Secretary and President will compile a summary of the month's meetings, ongoing projects, and financial expenditures (provided by the Treasurer) for review by the Advisory Committee.
- Annual Report: An Annual Programming Club Report must be prepared at the end of each academic year summarizing all achievements and structural developments.

11. Annual Activity Calendar

At the beginning of each academic year, the Executive Committee shall prepare an annual activity calendar.

Activity	Proposed Period	Responsible Team
Membership Drive (Grades 9-12)	Beginning of Year	Executive Committee
IT Quiz	Term 1	Quiz Team
Coding Workshops & Tech Talks	Term 1 & 2	Workshop Team
Hackathons & Inter-Branch Events	Term 2	Competition Team
Field Visits	Throughout Year	Executive Committee
IT Day & Innovation Showcase	Term 2/3	IT Day Team
Annual Report & Handover	End of Year	Secretary

12. Safety and Digital Responsibility

Technology activities must always be conducted responsibly. Members shall:

- Follow computer laboratory safety rules and acceptable use policies.
- Use hardware and enterprise networking equipment only under appropriate supervision.
- Never conduct unauthorized networking changes, bypass firewalls, or execute malicious code.
- Keep workstations clean and report accidents or hardware failures immediately.

13. Records to be Maintained

To ensure continuity, transparency, and accountability, the Programming Club should maintain the following official records:

- Membership Register
- Executive Committee Register
- Meeting Minutes
- Annual Activity Calendar
- Event and Hackathon Proposals
- Competition and Project Records (including codebase repositories)
- Workshop and Tech Talk Records
- Financial Records and Hardware Resource Inventories
- Photographic/Media Archive (including UI designs and digital assets)
- Activity and Progress Reports

14. Fundraising Activities

- Movie Showdowns
- PROGRAMMING CLUB T-shirts -> Members and EXCO
- PROGRAMMING CLUB Stickers
