PROGRAMMING CLUB
ROYAL INSTITUTE INTERNATIONAL SCHOOL, NUGEGODA

# Proposal: Programming Club Fundraiser Initiative

This proposal outlines a fundraising strategy for the Programming Club. The primary objective is to raise funds to support club activities, equipment, hackathon prizes, and community events while engaging members and the broader student body in tech-oriented activities.

## Proposed fundraiser idea

- **Movie showdown**

**Concept:**
An event that includes movie streaming which features sci-fi films, comedy and action-based films

- **Voting System:**

A week before the event, club members or ticket buyers vote on a shortlist of 3 movies via a Google Form or Instagram poll. The movie with the most votes wins.

- **Venue:**

Held in a media room or large classroom with a projector and good sound system.

- **Ticketing & Concessions:**

Charge a small entry fee which includes entry and basic snacks (like popcorn or a soft drink). a mini snack bar will be available during intermission.

- It brings tech-enthusiastic students together in a relaxed, fun environment, helping recruit new members who might be intimidated by pure coding events.

# Proposal: Programming Club Fundraiser Initiative

This proposal outlines a fundraising strategy for the Programming Club. The primary objective is to raise funds to support club activities, equipment, hackathon prizes, and community events while engaging members and the broader student body in tech-oriented activities.

## Proposed fundraiser idea

- **Hackathon**

**Concept:**

Teams could build apps or websites that solves a specific problem in their school.
Students could also design tools or games that help younger students to learn faster and more efficiently in the subjects that they struggle in.

- Mentorship: Senior programming club members and alumni act as mentors, guiding junior teams through debugging and project structuring.
- Judging Criteria: Projects are judged by a panel (teachers, tech alumni, or club execs) based on creativity, functionality, problem-solving, and presentation.

**Ticketing & Monetization Strategy:**

- Team Registration Fee: Charge a flat entry fee per team (e.g., 500 to 1,000 LKR per team depending on scale).
- Perks Included: The fee covers entry, digital participant certificates, snacks, and access to coding mentors.

## Gaming Tournament & Minecraft Buildathon

**concept:**

A multi-stage gaming event featuring competitive matches and a creative Minecraft building/coding sprint aimed at bringing together casual gamers, competitive players, and coders.

**Ticketing & Monetization Strategy:**

1. Participant Entry Fees: Charge per individual or team (e.g., 500 LKR per Minecraft team or 300 LKR per solo esports player).
2. Spectator Pass: Sell low-cost passes for non-gamers who want to watch the live matches, commentary, and final builds.
3. In-Game Extras & Snacks: Sell energy drinks, snacks, and official club stickers at the venue to maximize profits.

## Beginner Coding & Tech Workshop

- **concept:**

- An interactive, entry-level learning session designed to introduce non-programmers and junior students to essential programming concepts, building simple real-world projects in a single day.

- **Curriculum Tracks (Choose 1 or 2):**
  - **Option A (Python Basics):** Variables, loops, and building a simple text adventure game or calculator.
  - **Option B (Web Development Sprint):** HTML, CSS, and basic JavaScript to build and launch a personal portfolio website.
  - **Option C (AI Tools & Prompting):** Practical use of AI tools for study automation and basic script building.

**Ticketing & Monetization Strategy:**

Registration Fee: Charge an affordable entry fee per participant (e.g., 400–600 LKR)
